# The 12 Principles of Agile

## 1. Customer Satisfaction

Provide customer satisfaction by early and continuous delivery of valuable products

## 2. Requirements Change

Welcome changing requirements, even late in delivery

## 3. Deliver Working Solutions Frequently

Working features are delivered frequently in weeks, rather than months

## 4. Business & Working Team Collaboration

Close, daily cooperation between business people and those who execute the projects

## 5. Trust & Empower

Build solutions around motivated individuals, give them the environment and support they need, and trust them to get the job done

## 6. Face-to-face is the Best

Face-to-face conversations are the most efficient and effective way to communicate

## 7. Progress = Value Created

Working solutions are the principal measure of progress

## 8. Sustainable

Sustainable delivery, able to maintain a constant pace

## 9. Good Design

Continuous attention to excellence and good design enhances agility

## 10. Simplicity

The art of maximizing the amount of work not done is essential

## 11. Self-Organising

Best solutions emerge from self organising teams

## 12. Continuous Improvement

At regular intervals, the team reflects on how to become more effective and adjusts
